Mission, Vision and Value Statements

Mission

To promote physical and mental health and facilitate the prevention of disease, injury and disability for all St. Joseph County residents.

Vision

Healthy people in a healthy St. Joseph Community

Values

Daily we will:

Carry out the MISSION of the Health Department while striving to achieve EXCELLENCE in our work product and interactions with customers and coworkers.

Exhibit INTEGRITY in the workplace, always being truthful, honest and trustworthy.

Show RESPECT to customers, supervisors, coworkers and oneself.

Display a POSITIVE ATTITUDE.

ADVOCATE for our community's health.

Health Officer

2014 was a year of challenge for the St. Joseph County Health Department. We had retirements of long time employees, including Health Officer Dr. Thomas Felger and Food Service Director Rita Hooton. The financial situation in St. Joseph County continued to adversely affect the Department, and for the first time budget cuts affected services. The Department had to close the STD Clinic and Mishawaka Vital Records office, decrease the Immunization Clinic hours and eliminate the school-based Flu Mist program. Despite these issues, the Department continued to function at a high level with dedicated employees in all Divisions.

The Nursing Division handled several outbreaks of community and Nosocomial infections and were professional in TB case management. Emergency preparedness was challenged with Ebola planning and partner coordination. Under the leadership of the Health Education Division, the Community Health Alliance brought together many local agencies to collaborate on improving the health of our county. The Food Service Division instituted a survey of those who were inspected in order to gather feedback. The Vital Records Division continued to work in both the digital and manual worlds with efficiency. The Environmental Division participated in and led the institution of a Drinking Water Protection Plan for the county. As Interim Health Officer and Vice President of the Board of Health, I appreciate the efforts of the Health Department to maintain and improve the health of the people of St. Joseph County, Indiana.

St. Joseph County Health Department Staff

Staffing as of 12/31/2014

Dale D. Deardorff, MD - Interim Health Officer

Nick Molchan, MPA, REHS - Administrator

Mary Rooney - Executive Assistant

Amy Ruppe - Finance Manager

Epidemiology & Emergency Preparedness

Genessa Doolittle, MPH, CHES – Supervisor Paul Burrows – Local Public Health Coordinator

Environmental Health Services

Marc Nelson – Director
Linda Mauller, BS – Assistant Director
Denise Kingsberry – Administrative Assistant
LaTeesha Wright – Staff Assistant
Mark Espich
Matt Gavelek, P.E.
Whitney Griffin
Adrianne Lenyo
Jeff Murawski
Paula Reinhold

Food Services

Financial

During FY2014, the Health Department re-applied for the Bioterrorism/Emergency Preparedness program grant after taking a year off in 2013. In regards to revenue, the Health Department saw another decrease in fee revenue, which, when compared to 2013, was down by approximately 5.65%. The Health Department saw a significant decrease in tax support, which was approximately 39% less than in 2013.

- A \$3,500 NACCHO grant for our Medical Reserve Corp program
 - o (valid 01/05/13 thru 07/31/14)
- A \$23,722 ISDH grant for our Bioterrorism/Emergency Preparedness program
 - o (valid 07/10/14 thru 06/30/15)
- A \$50,000 grant for our Influenza Immunization program
 - o (valid 07/01/14 thru 12/31/14)
- A \$72,672 ISDH grant for our Local Health Maintenance program
 - o (valid 01/01/14 thru 12/31/14)
- A \$143,446.97 Local Health Department Trust Account grant from ISDH
 - o (valid 07/01/13 thru 12/31/14)
- A \$392,060 grant for our Health H.U.D. program
 - o (valid 05/01/12 thru 04/30/15)

Epidemiology & Emergency Preparedness

The Epidemiology & Emergency Preparedness Division is responsible for:

- Communicable disease investigation and surveillance
- Medical countermeasure dispensing planning
- Coordination of Emergency Support Function #8
- Emergency preparedness collaboration with other response agencies
- Emergency preparedness training and education

The Epidemiology & Emergency Preparedness Division provided support to other Divisions within the Health Department in the investigation and surveillance of communicable disease and public health threats. The Division also provided data to community workgroups as requested.

The Division participated in two full scale emergency exercises in 2014 (the 2014 St. Joseph County Airport Emergency Preparedness Exercise and the 2014 United States Postal Service Biohazard Detection System Exercise). A new Closed Point of Dispensing Site was added to the Health Department's plans, and emergency response equipment and technology was updated. The Division also conducted quarterly meetings of the Emergency Support Function #8, and convened workgroups to create plans for Ebola Virus Disease response and inclement weather plans for functional needs populations. Most importantly, the Division was able to significantly increase membership in the Medical Reserve Corps of St. Joseph County (MRC) through agency and community presentations.

The Division continued to collaborate with other organizations, providing representation on the Michiana Perinatal Consortium, the Child Fatality Review Team, the Penn-Harris-Madison District Safe Schools Committee, the Indiana State Department of Health's Public Health Emergency Preparedness Cooperative Agreement Committee, the District 2 Healthcare Coalition IN MRC, and numerous trainings and meetings with community preparedness partners.

Environmental Health Services

The Environmental Health Division implements the following programs to reduce the release of pathogens into the environment where they may expose the public. Most programs are regulatory driven.

- Septic System Permitting and Inspection Program
- Subdivision Planning and Review Program
- Wellhead Protection Permitting and Inspection Program
- Well Drilling and Water Supply Permitting Program
- Source Water Protection Program
- Lead and Healthy Homes Program
- Concentrated Animal Feeding Operations Permitting and Inspection Program
- Air Quality Program
- Vector Program
- Solid Waste Disposal Program
- Massage Permitting and Inspection Program
- Tattoo and Body Piercing Permitting and Inspection Program

Accomplishments in 2014

Staffing

Three of nine environmental health specialists resigned this year.

Drinking Water Protection Plan

The County is preparing a Drinking Water Protection Plan to assess the impact of septic systems on drinking water quality and develop alternatives for reducing that impact. The project is being guided by a Technical Working Group consisting of scientists, engineers, land use planners, industry representatives, and public officials.

The first phase of the project was to characterize the extent of contamination, which was completed last year. The second phase was to prepare the technical analysis of alternatives for addressing the problem, which was started this year and is 75% complete. The community outreach and education program was also initiated this year, and will include the preparation of educational videos, establishment of a web site, and holding several large and many small group meetings.

The loss of staff has severely delayed the project.

Source Water Protection Program

Many drinking water contamination issues were investigated and resolved this year, including the contamination of wells through the application of an aquatic herbicide to a lake and a major release of gasoline from an underground storage tank.

Lead Based Paint Hazard Control

The Division participated in 19 health fairs and other public events to test children for lead and provide information about preventing lead poisoning to parents. 89 children were tested at these events, which exceeded all outreach requirements of the three year grant.

Other Programs

Other programs proceeded as planned with no significant issues.

Food Services

The Food Services Division of the St. Joseph County Health Department is authorized by state and local laws to ensure that its 1,239 licensed food establishments serve food that is safe, honestly presented and not the possible source of a food related illness outbreak. To accomplish this, the Food Services inspection staff conduct unannounced on-site inspections designed to assess an establishment's level of compliance with state requirements and the extent of their adherence to local regulations. The number of inspections an establishment receives annually is determined by the complexity of the menu and degree preparation required.

The Food Services Division is also responsible for investigating complaints, reviewing plans for new or extensively remodeled establishments, performing inspections at temporary events, conducting Public/Semi Public Pool inspections and investigating pool complaints. Additionally, staff conducts fire investigations, consults with establishments on regulations and food safety and is sometimes required to collect samples for state analysis.

2014 Highlights

Staffing

A decrease in overall retail inspections is attributed to a divisional change in the frequency of inspections conducted at food establishments with lower risk menus. The change was necessary during the fourth quarter due to staff reductions resulting from the retirement of two Food Division staff.

Mobile Street Vending

The Division began collaboration with the City of South Bend's Licensing Department, discussing and then drafting guidelines that would allow food trucks to operate independent of any planned celebration or event. Growing industry trends and increasing inquiries from prospective mobile street food vendors have been the impetus for revising regulations and establishing procedures that will permit Mobile Street vending in St. Joseph County by spring of 2015.

Pools

Two staff members obtained Certified Pool Operators credentials and were trained to perform pool and spa inspections.

Highlighted Programs/Projects/Events

Health Education

The Health Education staff increased involvement in the school systems through implementation of the CATCH Program, and has continued to expand the Prescription to Play Program in partnership with the United Way.

St. Joseph County Health Improvement Alliance

More than forty different public health partners continue to work collaboratively on major health issues, system infrastructure and partner communication.

Reducing Obesity Coalition of St. Joseph County (ROC)

In partnership with several ROC members, the "Family Passport to Play" program was extended to a year-long initiative. The Walking School Bus Program was expanded to six Primary Centers. The Collective Impact Project for obesity is in its second stage, with Health Education staff assisting the United Way in gathering data from approximately two thousand school-aged children. Lastly, Mayor Buttigieg declared South Bend a "Let's Move City" early in 2014; by the end of 2014 South Bend had received several awards in three out of the five "Let's Move" categories.

Nursing

The Nursing Division includes the Public Health Nursing Division, the Immunization Clinics, Tuberculosis case management, and Medical Records. The Nursing Division is committed to community and public health nursing. They are advocates for providing access to care to the citizens of St. Joseph County. Nursing staff function in multiple roles within the Health Department and continue to expand their knowledge and skills.

Numbers included in these tables are subject to change following Indiana State Department of Health reconciliation.
